

# Commercial Property and Casualty Insurance company

## Automaton of end-to-end claims processing

### Business Challenges:

The insurer, which processes hundreds of workers' compensation claims for its many corporate clients, faced multiple challenges that impacted its speed of operation. Multiple data validations, missing information, and handling of temporal exceptions contributed to a processing time of two to three weeks per claim.

### Our Solution:

The insurer, which processes hundreds of workers' compensation claims for its many corporate clients, faced multiple challenges that impacted its speed of operation. Multiple data validations, missing information, and handling of temporal exceptions contributed to a processing time of two to three weeks per claim.

### Outcome:

Decrease in processing time

Cost savings upto 35%

Reduction in audits

More accuracy
